

United Saw Guide Oil is a low-viscosity saw guide lubricant designed with the perfect dose of tackifier to stay in place. This product lubricates the blade and guide, reducing friction, heat, and wear. United Saw Guide Oil has tacky properties that allow it to cling to affected areas of the saw guide system without being thrown away by high speeds.

## TYPICAL SPECIFICATION DATA

UNITED SAW GUIDE ISO 32	
<b>ISO GRADE</b>	<b>32</b>
Viscosity @ 100°C (cSt)	6.0
Viscosity @ 40°C (cSt)	33.0
Viscosity Index	129
Density (lb/gal)	7.11
Pour Point (°C)	-18
Pour Point (°F)	0
Flash Point (°C)	220
Flash Point (°F)	428
